Disclaimer

The ideas in this book are my observations and opinions and should not be taken as professional advice. You responsible to perform your own research as each geographical location has its own regulations. I am not a professional or licensed in any way so please consult one. If you take any of the ideas in this ebook and put them into action in your own life you are solely responsible. By continuing to read this book you agree that I, as the author of the book, am not responsible for your actions. I'm so glad that you downloaded this book and I wish you the best. If you have any questions you can always contact me at alex@tiny-house-plans.com.

Redistributing this book

You are free to share this ebook with anyone you'd like as long as you don't charge anyone for it and if you agree to leave the book as it is. You are not allowed to edit it in any way before you share it with others. If you want to send the book to a friend or family member use the form below and we'll create a download link just for them: <http://www.tiny-house-plans.com/tell-a-friend>

Thank you for reading

I'm so glad that you downloaded this book because that means you are taking a stand for freedom and a better environment. This movement is helping people change their lives and live their dreams and it will continue to do so more and more thanks to people like you who take action towards living consciously. I'm honored that you're here with me.

Affiliate Links

You'll find links throughout this book which take you to where you can learn more about each set of plans that are available. Many of these are affiliate links which means that if you wanted to purchase a construction guide, physical book, or building plans mentioned in this book I will be compensated for my efforts with no extra cost on your part. Thank you so much for your support as I could never do this without you.

Introduction

This Book's Purpose

I put this book together because I know that there is a lot of interest in tiny houses. If you're wondering if living tiny is right for you, this book will open your eyes up to the possibilities.

Living small may or may not be right for you. It's certainly not for everybody. The purpose of this book is to help you figure that out. And if it is right for you, how to start making it happen for yourself at whatever degree.

Why Tiny House Building Plans

Tiny house plans are the blueprint for the construction of your future home. You can use these designs to save you time or to create your own unique spin to any of them.

You can be as creative as you want or you can simply choose your favorite from one of growing amount of tiny house building plans available today.

How This Book Will Help You

After you are finished with this book you will have an understanding of what's available in the tiny house plans marketplace. Go to www.tiny-house-plans.com to download the latest edition of this book.

No Building Permits

Tiny houses are a great option for you if you're looking to live on the cheap while helping the environment. If a simple lifestyle sounds appealing to you, then this might seem too good to be true.

Since many of these dwellings are smaller than one hundred square feet there are no permits required to build in most backyards. They're just considered backyard sheds or maybe poolside cabanas.

The other "loophole" is when you build the house on a trailer it technically classifies it as one of two things: a custom built travel trailer or a utility trailer with a valuable load.

House That Goes With You

Many people are having success by building them onto trailers. At this point they are considered recreational vehicles or a utility trailer with a valuable load so you can park them in any areas where those are allowed.

When and if a problem arises you are always free to attach and go. For some people is the new American dream a house on the go? With today's growing technology, troubling economy and our planet's environmental problems I believe it's becoming appealing to more people from all walks of life.

Tiny House Plans

Jay Shafer of Tumbleweed Houses

Photo Courtesy of Tumbleweed Houses

Jay has been at the forefront of the tiny house movement because he has been living in spaces as small as most people's closets since 1997. And he's been very open about it giving several tours in person as well as on the Internet and television. He has been featured in numerous shows and his homes have been toured millions of times over.

He spends his time designing tiny houses for people like you and me through his company Tumbleweed Tiny Houses. He also tours the United States doing [workshops](#) for people who are interested in building their own little homes. You can learn more about his [workshops](#) here if you're interested, but for now let's get into Jay's tiny house designs beginning with his Box Bungalows.

Tumbleweed's Box Bungalow Tiny House Designs

Jay released six different designs that fall into the Box Bungalow brand. His former tiny house designs on trailers are now labeled as Houses To Go, although any of these houses can be built on a trailer or on a foundation.

When Tumbleweed Houses released these designs, three of them were featured on HGTV's Design Star for a design competition for the last three contestants on the show. It was the second to last episode. You can watch the full episode in case you haven't seen it already [right here](#).

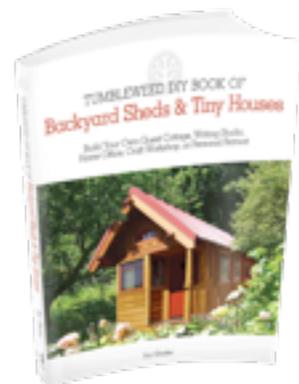

Along with the Box Bungalow designs came the release of Jay's latest book, the [Tumbleweed DIY Book of Backyard Sheds & Tiny Houses](#). You can get your own copy delivered to your door for \$19.99. You'll also receive a set of plans worth \$49 for FREE with your purchase.

Have you watched my [video](#) on how the Box Bungalow tiny house designs work? If not you can do so right now as long as you have an Internet connection. [Click here](#).

Box Bungalows

Tiny House Name	Size	Building Plans
Anderjack	99 square feet	\$49 - Order Now
Beaven	99 square feet	\$49 - Order Now
Gifford	99 square feet	\$49 - Order Now
Stamper	107 square feet	\$49 - Order Now
Weller	107 square feet	\$49 - Order Now
Zinn	99 square feet	\$49 - Order Now *

*If you decide to order your own copy of the [Tumbleweed DIY Book of Backyard Sheds & Tiny Houses](#) you'll also receive the [Zinn Box Bungalow plans](#) FREE.

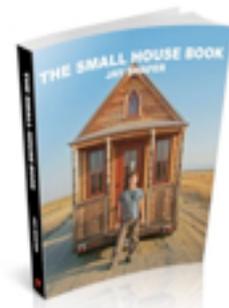

Tumbleweed's Houses To Go

Jay Shafer's Houses To Go plans include an incredible amount of interior detail which explains the dramatic price difference for plans when compared to the Box Bungalows. These houses are designed to be built on trailers, although the [Epu](#) and [XS-House](#) both fit within most backyard shed building code requirements.

Tiny House Name	Square Footage	Building Plans
Epu	89 square feet	\$859 - Order Now
Fencl	130 square feet	\$859 - Order Now
Lusby	117 square feet	\$859 - Order Now
Popomo	172 square feet	\$17 - Order Now *
Tarleton	117 square feet	\$859 - Order Now
Walden	117 square feet	\$859 - Order Now
Weebee	102 square feet	\$859 - Order Now
XS-House	65 square feet	\$99 - Order Now
Vardo	8' plans	\$29 - Order Now

*Get your own copy of [the Small House Book by Jay Shafer](#) and receive the [Popomo tiny house building plans](#) FREE.

Dee Williams of Portland Alternative Dwellings

Dee Williams built her tiny house on a trailer for about \$10,000 using mostly reclaimed materials. She has been living tiny ever since and helps other people do the same through her book, speaking, workshops and building plans.

Tiny House Name	Square Footage	Building Plans
Don Vardo	8' plans	\$30 - Order Now
12' Vardo	12' plans	\$30 - Order Now
Go House Go	<i>How to eBook</i>	\$20 - Order Now

Dee Williams' book is a tiny how-to manual that focuses on how to connect a tiny house on to a trailer. Plus it shows you how to keep the walls and roof from twisting. It's loaded with just enough technical information and resources to get your project started. Order your copy of [Go House Go: How to Build a Tiny House on Wheels](#) for \$19.99 right now through Portland Alternative Dwellings.

Dan Louche of Tiny Home Builders

Dan Louche designed and built his first tiny house, Tiny Retirement, for his mother. Recently he has completed the construction of his second house, Tiny Living. In addition he has put together an amazing eBook called the Tiny House Construction Guide which takes you step by step through the construction process.

The Retirement design does not include a sleeping loft because it's designed for those who prefer not to climb up and down ladders. The Tiny Living design, on the other hand, does include sleeping loft space.

Tiny House Name	Square Footage	Building Plans
Tiny Retirement	160 square feet	\$249 - Order Now *
Tiny Living	160 square feet	\$249 - Order Now *
Construction Guide	<i>How-to Building Guide</i>	\$34.99 - Order Now

*Plans are sold as a package so you will receive Dan's step by step Tiny House Construction Guide with either of your plans purchase.

Michael Janzen of Tiny House Design

Michael Janzen has been blogging and design tiny houses for the last few years. He's a Google SketchUp expert and has built his own tiny house on a trailer using recycled pallets.

Be sure to check out some of his affordable designs which are great if you've ever thought about going off the grid on your own land somewhere, want to build a backyard shed, office, work studio and more.

Tiny House Name	Square Footage	Building Plans
Tiny Market House	40 square feet	Free - Download Now
